

Amendment to Claims

This listing of Claims will replace all prior versions and listings of claims in this Application.

Listing of Claims

Claim 1. (CURRENTLY AMENDED) A method for segmentedly encrypting the data in a document print job in a manner which preserves options for post-rendering analysis/processing of selected non-content components comprising

identifying and individuating within such a job the content commands as distinguished from the non-content commands, and

identifying and individuating, within such content commands, the content-field portions of those commands, and

as a consequence of said identifying and individuating, encrypting only the content-field portions of the data contained within the content commands.

Claims 2 and 3. (CANCELLED WITHOUT PREJUDICE).

Claim 4. (CURRENTLY AMENDED) A segmentedly encrypted document print job comprising

an encrypted part which includes only data contained within the content-field portions of content commands that form components of the job, and

a non-encrypted part which includes the balance of data contained within the job.

Claim 5. (CANCELLED WITHOUT PREJUDICE).
